EDUCATION

Wayne State University

August, 2023

Bachelor's of Science in Computer Science, Minor in Design

- Cumulative GPA of 3.4

CERTIFICATIONS

- UE5 Course via Udemy, Python, Linux and C++ via Codecademy, and CISSO via Mile2.

SKILLS

- **Hard and Soft Skills:** Leading project teams, code reviewing and commenting, OOP, version control, setting up and executing tasks/projects, technical writing, meeting hard deadlines, learning on the fly, and effective communication.
- **Technical Skills:** GitHub, React, HTML, CSS, Python, XML, Java, C++, and Word/Google apps. Basic knowledge of C, AWS and Google Cloud/Firebase.

PROJECTS

- **Project 1:** I've created a portfolio website on GitHub Pages, that includes more about me, my projects, work, etc.
- **Project 2:** I made a password generator that saves new passwords automatically, and can specify different levels of security. There are no online saves; just a user and a text file. It is much simpler and safer for users that may be worried about leaks. It is on my website and my GitHub.

WORK EXPERIENCE

Camfil Inc.

Aug. 2023 – Present

Warehouse Associate

Livonia, MI

- As a warehouse associate, I collaborate closely with the warehouse manager to ensure timely completion of custom orders and deliveries, including will calls, shipments, and Camfil truck deliveries. My team and I, alongside the salesmen, directly affect how fast orders get out, which affects our business, and we're doing very well profit-wise compared to the previous year. I've learned much about managing a team in a commercial setting, inventory management, organization, and dealing with somewhat stressful situations.

Great Lakes Ace

May 2023 – November 2023

Grill Assembler

Livonia, MI

- At Ace, I would assemble grills to be shipped or delivered to customers and/or stores. This sped up the process of order filling, and helped local Ace stores stock up and show off their grills to paying customers. I learned how to fix and assemble grills, which gives me a handy edge, and learned a bit about limits on parts, managing time efficiently, and respecting others.
